Languages: javascript,c,html5,css3,SQL,node.js
Framework: bootstrap,express
Libraries: react.js,redux.js
tools: Mongodb,git
soft skills: leadership,communication

Projects

Property dealing Web app [click](#) [🔗](#)

- I Have developed a Property Dealing webapp Named As PropertyAtm.In This I add range of essential features to enhance user experience and security. These include creating a secure account registration process with email and phone number validation, implementing a robust login system, I also enhanced account security with secure password management here you see properties available at lucknow anywhere it is for multipurpose like take property at rent and buy property .you directly constact to property dealer .and make query for that.these contributions demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, Redux, CSS3, HTML5, Bootstrap,with localStorage

Associate panel Webapp [click](#) [🔗](#)

- I Have developed a Associate panel webapp Named As cp.tantrash.com these contributions demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, Redux, CSS3, HTML5, Bootstrap,with localStorage

Customer panel Webapp

[click](#) [🔗](#)

- I Have developed a Customer panel these contributions demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, Redux, CSS3, HTML5, Bootstrap,with localStorage

Organic Ecommerce-webapp

[click](#) [🔗](#)

- I Have developed a ecommerce web application named as dev.ravorganics.com web app This include creating a secure account registration process with email ,otp with phone number and scurity code validation, implementing a robust login system .this is more user friend and i am trying to give best from my side all the features are available as flipkart ,amazon etc. it demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and mongodb

ATM Machine Web app

[github](#) [🔗](#)

- I Have developed a range of essential features for an application to enhance user experience and security. These include creating a secure account registration process with email and phone number validation, implementing a robust login system, I also enhanced account security with secure ATM PIN management and developed tools such as transaction history viewing, a forgot password feature for easy account recovery, and a currency converter for user convenience. These contributions demonstrate my broad skill set and commitment to delivering

comprehensive solutions.

- Tech: React Js, JavaScript, Redux, CSS3, HTML5, Bootstrap,with localStorage

Credentials-manager-system

[github](#) 

- I Have developed a credentials manager system and developed a range of essential features for an application to enhance user experience and security. These include creating a secure account registration process with email and phone number validation, implementing a robust login system, a forgot password feature for easy account recovery,here you can store your social media account information with encoded form and security These contributions demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, R
educ, CSS3, HTML5, Bootstrap and firebase realtime database

Ecommerce-webapp

[github](#) 

- I Have developed a ecommerce web application named as nest web app This include creating a secure account registration process with email ,phone number and security code validation, implementing a robust login system . Here also can add cart in your wishlist and can by a product with tracking system of your product it demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and mongodb

Student greivance system

[github](#) 

- I have developed a student complaints system web application This include creating a secure account registration process with email ,phone number and validation, implementing a robust login system . Here every user can add complaints and see the status it demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and mongodb

Real time chat application

[github](#) 

- I have developed a range of essential features for an application to enhance user experience and security. These include creating a secure account registration process with Unique user name and password validation, implementing a robust login system. Tech: React Js, JavaScript, Redux, CSS3, HTML5, Bootstrap, Chart Js, Bootstrap
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and mongodb

Flipkart clone

[github](#) 

- I Have developed a flipkart webapp This include creating a secure account registration process with email ,phone number and security code validation, implementing a robust login system . Here also can add cart in your wishlist and can by a product with tracking system of your product it demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and mongodb

Phone book

[github](#) 

- I Have developed a phone book This include creating a secure account registration process with email ,password validation, implementing a robust login system . Here you can save phone contacts like phone and can delete update also . I used a firebase real time database it demonstrate my broad skill set and commitment to delivering comprehensive solutions.
- Tech: React Js, JavaScript, CSS3, HTML5, Bootstrap and firebase

Experience

Mern stack web developer

*Tantrash Technology
Private Limited (TTPL)
feb-2025 – Present*

- At TTPL I am Working as React developer.
- Working with Real Life Projects till now I completed PropertyATM WebApp,Kezan Pustkalaya web App,associate

Admin Panel, costumer Admin panel, organic(ecommerce) webapp
Mern stack web developer

*Papaya Coders Private
Limited Lucknow
Dec-2024 – feb 2025*

- At Papaya coders Private Limited company I am Working as mern stack web developer post.
- Working with Real Life Projects

Mern stack web developer Intern

*ZN Infotech Lucknow
July 2024 – Aug 2024*

- At ZN Infotech I gained the experience of web development.
- Build flipkart clone with mern(mongodb, express, react.js, node.js) and bootstrap.

Mern stack web developer Intern

*Softflex smart solution
and training Institute
sep 2024 – january
2024*

- At Softflex I gained the experience of web development with experienced developer.
- Build ATM Machine with mern(mongodb, express, react.js, node.js) and bootstrap.
